

Chapter 2

15. Magnet schools An article in the Winter 2003 issue of *Chance* magazine reported on the Houston Independent School District's magnet schools programs. Of the 1755 qualified applicants, 931 were accepted, 298 were wait-listed, and 526 were turned away for lack of space. Find the relative frequency distribution of the decisions made, and write a sentence describing it.

16. Magnet schools again The *Chance* article about the Houston magnet schools program described in Exercise 15 also indicated that 517 applicants were Black or Hispanic, 292 Asian, and 946 White. Summarize the relative frequency distribution of ethnicity with a sentence or two (in the proper context, of course).
